Subject: Plume Results
Attachments: removed.txt; Data Summary Report - VPB 158_July 3 2015.pdf

Paul, Bill:

Attached is the first of three emails I will be forwarding to you. The file size is too large to send at one time. The emails contain plume results I received today from the Navy consultant. The numbers are very disturbing as the plume is maintaining its concentration from previous samples. In some cases they are higher. Please review the information and give me a call to discuss. Bill- This information is important to Levittown Water District. Thank you.
